

Technical Rider / DJ stage plan Oliver Schories

Oliver needs provided:

- Solid desk: 1,10m high (make sure it really is, Oliver is 1,93m tall), 1,50m x 1m surface area, free from feedback and not shaking. Oliver prefers to play in the clubs dj booth rather than on a stage. If the booth is not high enough please put something stable underneath the players and mixer to ensure the height.

- 4x Pioneer CDJ 2000 **nexus (II)** CD-Players with working SD Card Slots. The Players must all be linked with Ethernet cables and a hub. **No other CD-Players are accepted.**

For performances up to 2 hours only 3 CD-Players are ok. In this case, please leave CH 2 free.

- 1 x Pioneer DJM 900 nexus (II) mixer. **No other mixer is accepted.**

NO Allen & Heath, NO PIONEER 800, NO PIONEER 850, NO PIONEER 2000 NEXUS etc.)

- 2 x Monitor speakers from Funktion One – preferably Funktion One “Resolution 2”

(on both sides of the dj, the volume must be accessible from the mixer)

Important:

Please set up, adjust and check the entire setup before artist arrives.

If the stage is crowded Oliver will not start to play.

AUDIO AND VIDEO RECORDINGS ARE EXPLICITLY NOT ALLOWED.

DRINKS ON STAGE: COOLED BEER AND WATER (NON-SPARKLING) IN CLOSED BOTTLES / CANS
